EMPLOYMENT IN LARGER PRIVATE FACTORIES - STATE DETAILS

APRIL, 1964

DEPOSIT COPY
MAY NOT
BE BORROWED

Information on changes in employment in the larger privately-owned factories, derived from a monthly survey undertaken by joint arrangement between the Department of Labour and National Service and the Bureau of Census and Statistics, is given in the attached tables for the various industrial groups in each State.

Particulars of the principal changes in the level of employment between March and April, 1964, in each of the five mainland States are shown for factories engaged in the manufacture of food, drink and tobacco in Table 1 and for other factories in Table 2. In these tables, although employment variations for all industries in each industrial group have been included in the group totals, minor variations in individual industries have not been shown separately. The industry figures shown cannot, therefore, be added across to give totals for the five mainland States.

Table 3 gives details of employment by industrial groups in each of the five mainland States, and a finer division by industry sub-groups is shown in Table 4.

For Tasmania, the principal changes in the level of employment between March and April, 1964, are shown in Table 5. Minor variations in individual industries have not been shown separately. Employment in the main industrial groups is shown in Table 6. Owing to the risk of disclosure of individual factory particulars, these figures cannot be made available in the same detail as those for other States.

Total employment in all factories surveyed fell by 597 (+1,920 males, -2,517 females) between March and April, 1964. Employment increased in Queensland (+1,812), New South Wales (+691), Western Australia (+24) and Tasmania (+10), but decreased in Victoria (-2,537) and South Australia (-597). The level of employment in April, 1964, was 27,959 higher than in April, 1963.
